

Made in Italy and constructed with high quality Italian stainless steel and only Italian components. Designed to increase production in paint shops. Speeding up cleaning times and reducing gun wash used. The GMW-01 manual gun wash machine has multiple functions.

- ✔ A clean rinse function on the brush, controlled by a lever on the control panel. This allows the trades person the clean the bulk of the spray gun with recycled gun wash, then changing to clean gun wash for the final portion of the clean. Resulting in a excellent gun clean while using less gun wash in the process.
- ✔ Other functions include a fine high pressure mist, used for inside lids and small components.
- ✔ A clean gun wash tap on the control panel allows trades persons to fill the spray gun for spray out.
- ✔ A air blower on the side of the machine allows for easy access to dry parts.
- ✔ Air exhaust system removing fumes via the flu ducting, all machine come standard with ducting.
- ✔ Replicable gun wash brush head, soft, medium, hard.
- ✔ Compatible with water and solvent paints.

Atlas gun wash machines have been sold in Australia since 2000. We provide service and spare parts Australia wide.
